Universal pivoting vice

Mechanical single vice for light machining and tool grinding.
 Universal rotation and pivoting in all axial directions.

- > This vice is particularly well suited for grinding work on grinding machine tools and for light milling and drilling works. Workpieces can be machined in a vice on various plans
- > Force transducer: Mechanical without high pressure, manually actuated with manual crank
- > Characteristics: Pivoting on 3 planes! 1 x 360° and 2 x 90°
- > Design: All pivot centres lie on one plane, which contributes to stabilisation

Scope of delivery:

1 manual crank, 2 keys

Clamping force: max. 10 kN at approx. tightening torque 30 Nm

Pivoting on 3 planes

360° horizontal pivoting range
 90° resp. side and front face pivoting range
 with highly legible scale
